First, select from File -> Make a copy to make a copy of the template for your competition.

Start the program by defining your race in the Definitions sheet

- Categories
- Sections (like 6 or 1,2,3,5,6)
- Rider numbers (from where to start, consecutive scheme will be applied, you can change the numbers later)
- How many riders will be put to each category at the first place (this can be altered later, you can add and remove riders)
- Category color

Do this in consecutive lines from 2 to 17, leave first cell after the last category

Then define column headings

- Abbreviations for position and number in line 20, if you change these afterwards in Definitions sheet or the main Results sheet, sorting will not work
- In line 21 you define various rider information, you can define as many columns as you want, but keep name as first and club as second. These are used in reporting the results. After these you can add UCI ID, birthdate, whatever you want
- Then give name for
 - * time column (line 22)
 - * penalty column (line 23)
 - * total points column (line 24)
 - * abbreviation for lap (line 25)
 - * competition name (line 26)
 - * competition date (line 27)

After all the following is done, click the icon below Create sheet with name Results ...

This will create a new sheet for you. It will take some time and you can follow the progress. You will be asked for authorization to execute the app. The app requires access to your Google Drive, View and manage your spreadsheets and send e-mails etc. Please, read privacy policy to understand why such permissions are required. There might be a warning that Google has not checked the app and you need some work to give the permission for the app. I don't want to take the software to a professional one with a paid subscription so that Google verifies the app.

After the sheet is done, new menu will appear to the menu bar: Trials menu. This menu is used to add new riders to categories, delete riders, sort results, make backup sheet, create section cards and report results.

Fill in the rider information you need next. You are free to change the riders' numbers and input all the other data, but don't change anything else, not even the abbreviations. Keep the empty rows between the categories empty as well.

To add new rider to a category, go to Trials menu and select category to which you want to add a rider. To delete a rider, select one column from the rider's row and select Delete selected rider from the Trials menu. Don't select any other line for deleting. The software will not work anymore after that. To sort the riders, select Sort riders from the trials menu. Sorting is done properly according to the UCI definition, don't suspect it.

Enter to the time column riders' riding time in format hh:mm. Then, the sorting is done correctly in case of a tie (with points, zeros, ones etc). This information is used only in case of a full tie after the points.

After the competition, you can hide some columns, like time and penalty (click the column and select Hide column), if you don't want these to be visible in the final and official results sheet. Important: Go to View and hide Gridlines by clicking the row Gridlines to make the results pdf look nicer. These cannot be hidden programmatically (shame on you Google). After you are happy with the view, go to the Trials menu and select Report results. This will open a new form to the right hand side of the screen for you. Fill in all the necessary information and send the results. You can also play around and send the results to your e-mail whenever you want etc, but at the end, remember to send the results to antti@stenvall.fi and tulokset@pyoraily.fi (mandatory) and xkarim@kolumbus.fi (optional, http://www.tulospalvelu.profiili.fi/etusivu/).

I, Antti Stenvall, the author of this experimental software will quarantee that the version of the software I have written

- does not follow your use of this software in anyway
- will not track you (apart from what Google does on its own, but this information is not available to me)
- will not go through your Google Drive files
- will not remove, modify, download, or create any other files to your Google Drive that are absolutely necessary for this software to work
- will not send any e-mails as you unless you specifically request so (this is in results reporting)

However, to operate this software quite delicate permissions are requiried from your Google account. Next I explain what and why

- The software needs to manipulate your Spreadsheets.

Otherwise it is not possible create the Results sheet automatically based on the data you have give in the Definitions sheet.

- The software needs to send e-mail as you. Otherwise it is not possible to report the results.
- The software must be able to manage your Google Drive files.

 Otherwise it is not possible to create a pdf from the Results sheet or create Suomen Pyöräily formatted results Excel file.
- The software must be able to run third party sidebars and prompts.

 Otherwise it is not possible to ask you to input data for the results reporting e-mail or to click the link which downloads the Suomen Pyöräily formatted Excel file.

In addition Google's automatic check says that the software can

- Allow this application to run when you are not present and
- Connect to an external service

I think the first one is related to doing e.g. sorting of the riders in the Google's server, which is done asynchronously (as well as the email sending and SP Excel generation). The second one might be due to connecting to e-mail server (gmail). I don't know why Google says that the software requires it.

This software is open source. You can always click: Tools -> Script editor to see what kind of code is in there.
